

TRADE UP NEXT GENERATION INVOICING

Causeway's **Tradex e-invoicing** solution has been in operation for over 15 years and enables supply chain partners to manage their full Source to Pay process.

e-Catalogues / e-Requisitions and e-Ordering

Tradex provides organisations with the ability to create **requisitions** and **purchase orders** within an online environment that seamlessly integrates with an organisation's ERP.

Users will select items from a list of products from a catalogue which is uploaded into the Tradex portal by approved suppliers. The catalogue can be accessed directly within the web interface or via a punch-out from their own back office system.

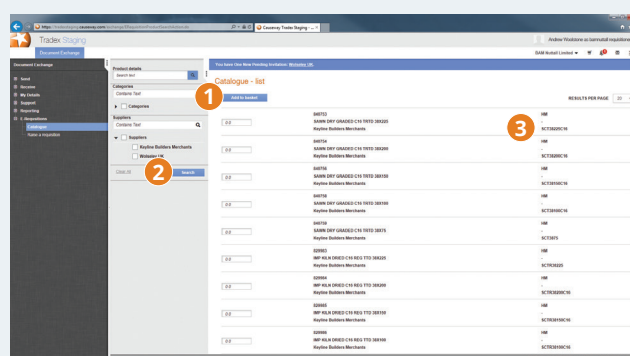

BUYERS

Buyers can use product information in an online catalogue to support electronic requisitions and orders.

1 The user is able to select the quantity of each product and simply **Add to Basket**.

2 Products can be accessed via a **browse by category or search**.

3 Information such as **availability and standard codes** can be seen to help selection.

The buyer can specify a delivery or collection from a list of branches for the supplier.

SUPPLIERS

Suppliers have the ability to import a catalogue file as needed through the online web interface in Tradex.

- 1 Product **items are categorised** so that they can be found through browsing or searching.
- 2 Catalogues can contain **links to product** images and detailed information.

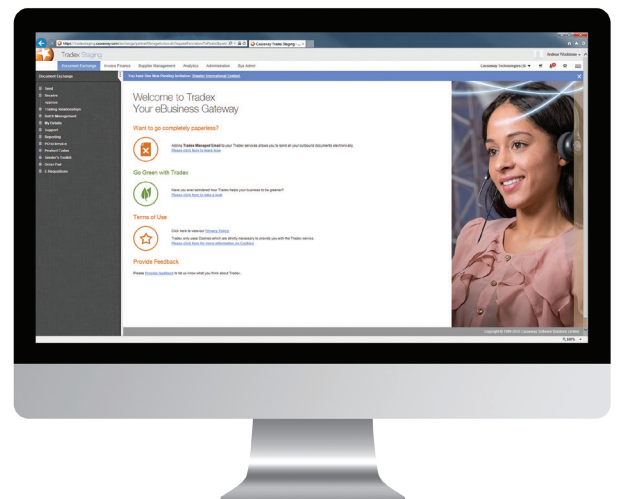

[illegible]

Catalogues can be made **available to one or many** buyers.

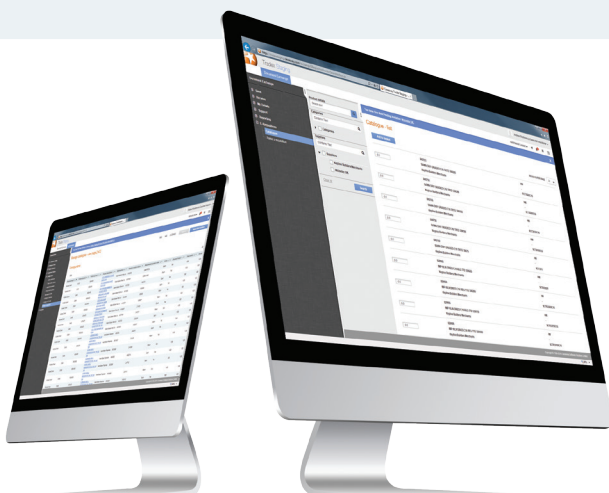

Branches are maintained by the supplier **can be product specific.**

e-Ordering

Once an order has been raised it can be sent through Tradex directly to the supplier. This can be via a managed email process to record delivery of the orders or directly to a suppliers connected back office system. With product details originating from a catalogue the information is validated through business rules so that accuracy is maintained and orders are placed directly without errors eliminating delays.

Fully integrated solution

e-Invoicing

Causeway's Tradex **e-Invoicing** software enables supply chain partners to electronically send and receive trading documents such as invoices, requisitions and purchase orders. Companies can trade electronically through a scalable and flexible integration hub that supports multiple document types and user services.

e-Invoicing is fully integrated with the **e-Catalogues, e-Requisitions** and **e-Ordering** features, which allows companies to **improve control, automate processes and increase efficiencies**.

Measurable performance gains

EXECUTIVES

Reduce operating overhead

Improve payment terms

Increase operational efficiency

Improve chances of preferred supplier status

Reduce carbon footprint

MANAGERS

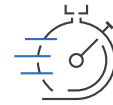

Reduce invoice queries

Simplify purchasing and budget matching

Improve certainty over payment

Shorten time to query resolution

TRADE UP NEXT GENERATION INVOICING

Causeway's **Tradex e-invoicing** solution has been in operation for over 15 years and enables supply chain partners to manage their full Source to Pay process.

I sometimes think, if it wasn't for Tradex how would we cope now? It has become as difficult to imagine operating without Tradex as imagining doing business without the internet or a mobile phone.

RICHARD HETHERINGTON
PROCUREMENT DIRECTOR – ALFRED MCALPINE

Tradex e-invoicing

Partners are able to electronically send and receive trading documents such as invoices, requisitions and purchase orders. Once connected, companies can trade electronically through a scalable and flexible integration hub that supports multiple document types and user services.

Free connections for suppliers

Our 100% Cloud based e-commerce solution eliminates inefficiencies associated with handling paper documents to deliver significant cost reductions in the management of electronic transactions throughout the supply chain. Suppliers can join for free, and also have access to our Supply Chain Finance offering.

Trade securely

With **40,000+ organisations** using Tradex, and growing at a rate of 300+ companies a month, we are the **largest trading community in the UK**. Over £8 billion of transactions are processed via Tradex per annum, and over 25,000 transactions occur per day.

In one year, by removing the need for paper invoices, we've helped our users **reduce invoice processing costs by up to 60%, saving...**
