

BUSINESS CONTINUITY MANAGEMENT POLICY

The Causeway board of directors recognises the importance and significance of Business Continuity and via compliance to the requirements of ISO 22301, is committed to continually improving our Business Continuity Management System in all areas of their business. Like all responsible companies Causeway is aware of the need to recognise the importance of protecting its stakeholders from disruptions.

Causeway is committed to documenting, implementing and maintaining an appropriate Business Continuity Management System that endeavours to:

- Identify our key product and services that support our objectives, obligations and statutory duties.
- Ensure that our employees and all those who work on behalf of the organisation understand the part they play in the achievement of our objectives through effective training and communication at all levels.
- Ensure that suppliers and customers are fully aware of the policy and request them to adopt similar practices..
- Comply with all relevant local, national and international laws, regulations and other applicable requirements.

Our Business Continuity Management System will be reviewed and tested where possible at appropriate planned intervals with minimal interruption to normal business activity. Additionally, as changes occur in the organisation, the Business Continuity Management System will be updated accordingly to reflect such changes.

Causeway has decided not to communicate externally on its Business Continuity risks and impacts.

This policy is made available to the public.
