

Digitising Labour Management Has Never Been More Important

Discover how the Causeway Donseed labour management solution can help your business address the immediate challenges of real time project visibility, workforce payments, productivity and the wellbeing of your workforce with site inductions and timesheets in the cloud.

AN OPERATIVE'S DIGITAL JOURNEY

Complete Digital Induction at Home or Whilst on the Move

Commute to Work / Receive Updates

SIGN-OUT

Sign-Out on Site

SIGN-IN

Sign-In on Site

Provide your workforce with multiple sign in/out options including fingerprint recognition tablets, contactless facial recognition units, biometric turnstiles, mobile apps or a combination of all four.

Commute back Home / Receive Updates

Digitising the induction process and implementing biometric data capture not only helps manage time and attendance, but it also helps to support social distancing on site and can bring a whole host of operational benefits for the management team.

DATA IN ONE CENTRALISED CLOUD-BASED PLATFORM

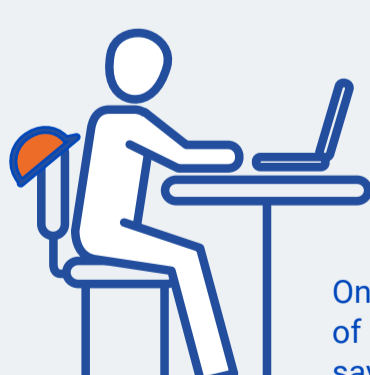

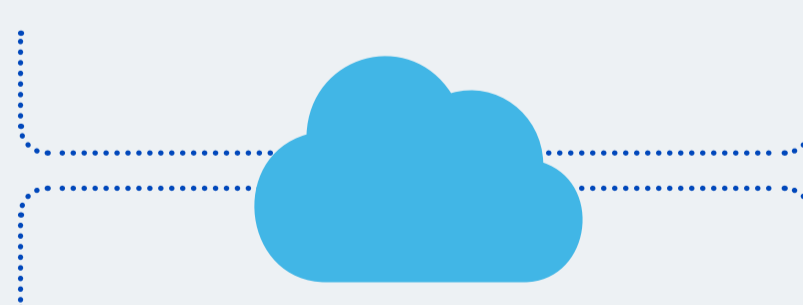

Gain Visibility Across Live Projects in Real-Time

Make more informed decisions with real-time visibility of all of your projects in the cloud. View platform dashboards, set-up scheduled reports and create automated compliance alerts.

Manage Safety, Toolbox Talks and Qualifications

Minimise your exposure to health and safety risks and ensure compliance on site by managing operative qualifications, PPE conformance and toolbox talks in one centralised platform.

On average 30 minutes of unproductive time saved per induction

Improve Productivity with Digital Inductions

Provide your workforce with a safe and productive way of completing fully customisable site inductions and daily checks with the cloud via desktop or mobile before they return to work.

Sign-In: 07:36am
Sign-Out: 16:42pm
Unpaid Breaks: 45 mins
Total Hours: 8hrs 21mins

Establish Commercial Controls with Biometric Data

Keep on top of changes to working hours, shift patterns and sub-contractor movements with accurate, reliable and consistent biometric data.
