

# Map Assisted Scheduling and Job Management

The Causeway Job Management Platform makes it easy to schedule tasks and determine the optimum route in a clear visual manner with associated data shown as map layers to ensure all relevant factors have been taken into account in the decision making process. These decisions are reflected in CPA with integration to Mobile, Permitting and Client Systems.

*A cloud-based service providing an environment that empowers organisations to **assign and route tasks** in a visual map environment*

## Key Benefits

- Easy visualisation of work to be scheduled
- Associated Map data for better Assignment Decisions
- Google routing for optimum job schedule
- Showing your clients you are a forward thinking organisation when it comes to scheduling and prioritising their jobs
- API integration to CPA for dynamic commit of data
- Telematics Positional data to aid emergency assignment
- Dynamic Framework that enables schedulers to layout their workspace to effectively manage the task in hand

## Core Functionalities

CPA Task Templates

Google Maps/Routing

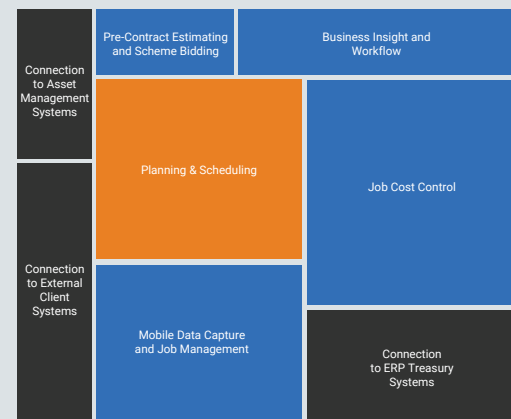

Dynamic In-Map Filters

Drag & Drop Filters

API Based

CPA Data shown as Layers

CPA Accessed in Same Framework

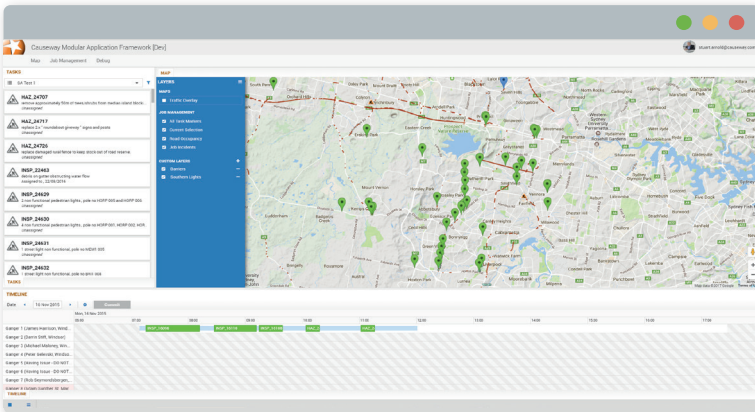

3rd Party KML KMZ Layers

Add CPA data in Map

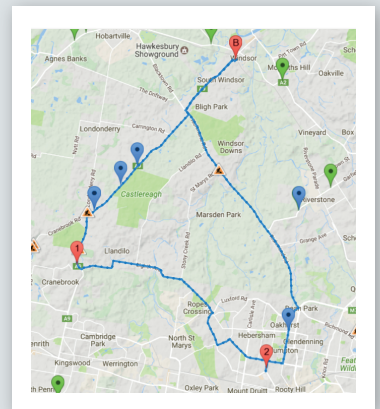

## Map Framework

Allow users to layout panels of data around the map so that only the information pertinent to the job is visible. Easy to bring back and position panels as required.

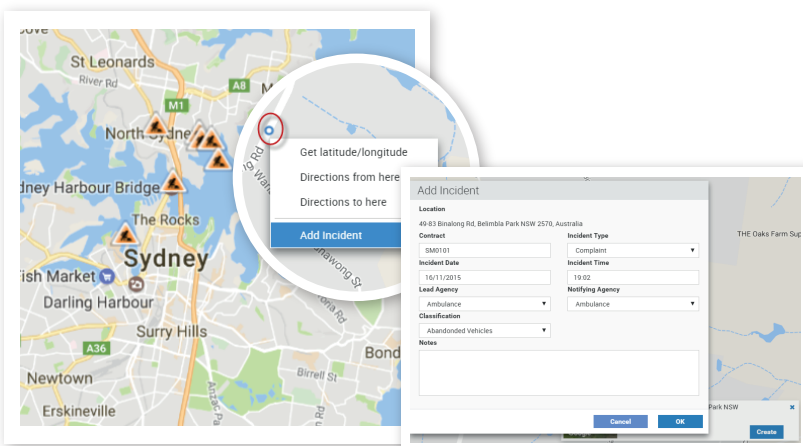

## Routing

Efficient routing of tasks and visualisation of nearby jobs together with other pertinent data

## Add data in Map

## Integration

Integrated to CPA and Google via APIs
